Taehoon Yoon

ASPIRING APPLIED AI ENGINEER LEVERAGING A FULL STACK BACKGROUND TO BUILD AI-POWERED SOLUTIONS

Email: devtae10@gmail.com
Portfolio: taecodes.com
Location: Elizabeth, NJ LinkedIn: www.linkedin.com/in/developer-tae

SUMMARY

Strong interest in AI/LLM integration with hands-on exposure to tools like ChatGPT, Gemini, and Zapier. Actively exploring RAG pipelines to combine LLM capabilities with external data sources for more accurate, context-aware responses. Eager to apply this knowledge in real-world applications. Known for being a fast learner with strong problem-solving skills, adaptability, and a solid foundation in full stack development.

PROJECTS

AI Automation Tools (*In Progress*)

- Exploring RAG pipelines to combine language models with external data sources for more accurate, context-aware outputs.
- Experimenting with prompt engineering strategies to optimize model behavior for different tasks and use cases.
- Learning fine-tuning techniques using platforms like OpenAI and Hugging Face to customize models for specific domains.
- Investigating vector databases such as Pinecone and Weaviate for semantic search, embedding storage, and LLM memory applications.

Build-A-Habit – *React + FullCalendar*

- A scheduling app with full CRUD, authentication, and React Router.
- Fully deployed on Render.

EasySellEasyBuy – *React + Rails*

- E-commerce app with secure login, many-to-many relationships, and state management with React Context.

EDUCATION

Flatiron School – *Full Stack Software Engineering* Certificate, 2023

City College of New York – *Psychology Major*, 2008–2012

EXPERIENCE

Web Content Author / Front-End Developer
HSAD (LG Electronics USA) · Englewood Cliffs, NJ
May 2024 – Present

- Developed responsive landing pages for LG.com using HTML, CSS, and Bootstrap, ensuring consistent performance across devices and browsers.
- Translated Figma designs into pixel-perfect front-end implementations with interactive, accessible UI components.
- Collaborated with global content teams to migrate and manage website assets within ContentStack CMS, improving scalability and team workflow.
- Created and updated marketing and promotional pages daily in alignment with ongoing business initiatives and seasonal campaigns.

Web Developer
Way Maker NJ (Part-Time) · Fairview, NJ
March 2022 – Present

- Designed, built, and maintained a responsive, SEO-friendly website, resulting in improved user engagement and retention.
- Built AI-assisted workflows by integrating ChatGPT and Zapier, automating repetitive operational tasks such as email generation, content suggestions, and data entry.
- Leveraged AI tools for code debugging, refactoring, and drafting technical documentation, accelerating development cycles.
- Actively researching and experimenting with RAG (Retrieval-Augmented Generation) pipelines and LLM APIs to prototype future enhancements.

SKILLS

- AI/LLM Integration
- Full-Stack Development
- Zapier, LangChain (learning), Prompt Engineering
- RAG Pipelines, Fine-tuning (OpenAI, Hugging Face)
- Pinecone, Weaviate (vector databases)
- JavaScript (ES6+), React, Node.js
- Ruby on Rails, Sinatra, SQL
- HTML5, CSS3, Bootstrap, Material UI
